

CONNECTED TO THE HEART OF GLADIO – BEHIND THE SCENES OF THE FALSE FLAGS

MY STORY

What I must tell you is not easy, because I'm in a very particular situation, that you cannot imagine. I'm very afraid that you will think that I'm crazy or that I dream. So please, be indulgent for what you will read here, and for my English too. My mother tongue is French, but I speak and write English continuously.

My real name is Marc Delantre (pseudonym). I'm Belgian 56 years old, living with my Filipina partner and my disabled son in the Philippines for 3 years (and Madagascar before), for our protection. For now, we are safe, and you will understand below, who are the ones who are protecting us.

I'm a very regular IT man, not a hacker, not a specialist in anything. But my occupation for 10 years, and particularly now, is the **terror Intelligence**. You cannot imagine at which level and I did not choose it. You will understand, but I have to precise, I have never officially worked for any agency, (even if I have regular relations with several of them), for any army, or police. I have an exceptional position, but it's because "they" chose me for some and unique reasons.

This exceptional situation began in the Summer 2008, so 10 years ago, exactly. There are the most important steps of these 10 years. Of course, everything below is 100% true, with no exaggeration at all. This story is already hard to believe. I don't need to add anything. In the opposite, I'm scared that you don't believe me.

+ **2008**, a very police officer, forces me to work as IT man for a large organized crime organization in Europe (10 billion of USD in 10 years). "For," not against! I really don't want to join this organization, and I contact the French authorities, in Paris. I meet them, with the information I got already, and they ask me to stay in this organization as an undercover man. I don't have the choice and working with the high police officer FOR and within the organized crime, I see, hear, understand that this high police officer is deeply terrorism-oriented, even if he is not Muslim at all. But, he is married for years with an Islamist very radicalized girl, and all the family enjoys terrorism (but not for the same reasons, you will understand). He is particularly proud of the 9 11, and at this time, I did not understand why.

+ **2009**, my position becomes very difficult with this organization. I must cross a legal red line, and I don't want. I decide to denounce everything, organized crime, and terrorism. But the Belgian Justice doesn't do anything, and I feel in danger with the organized crime and the Islamists at my heels. Then, I'm contacted by an alleged Mossad agent. I say "alleged" because I don't know exactly on what side, he really was, but this agent, wants to bring me back in Belgium under high protection in a safe house. It's what he did in 2010, and the house, a former bank, has just been bought for this purpose. He still had the notarial documents in the hands, and he could not manage the keys.

+ **2011**, the high police officer tries to silence me, and this alleged Mossad saves me immediately. So, I ask a serious explanation about my situation and their protection. His answers are incredible, but you will begin to understand. This alleged Mossad agent, says (I have all this on MP3) that they track this high police officer since the 90's. Maybe they were partners also. It's not easy to say. He explains that the high police officer is :

- Close to famous terrorists. Yes, these ones are famous terrorists, but it's not clear, in 2018, if they were also agents for NATO or CIA...
- Involved in the organization of assassination of Massoud command on September 9, 2001, because Massoud knew about 9 11.

- The one who provided the fake Belgian documents to the Tunisian murders.
- Very close to all terrorist networks and organized crime in Belgium and in the neighboring countries.
- The one at the origin of my recruitment for the organized crime.
- So powerful, that never, Belgium will do something against him, and this alleged Mossad agent commands me to not try to open any new case at the court against him.....

+**2012**, this alleged Mossad agent, that I recorded entirely on MP3, is killed, a little like Skripal, in the UK. My wife disappears some weeks after and the high police officer threatens me if I try to look for her.

I will explain this later but remind that it's exactly at this time, that an IT organization, named v-DOS, borns in Israel. It's important to see the link about the timing.

+**2013**, I live alone in a very small apartment in Belgium, and I begin to experience some incredible problems of home and computer intrusions, and very high-level hackings. All this is very professional.

Some home intrusions occur in the middle of the night, in some minutes only. They open my front door (locked), without damage, they open my computer (locked), and they read the emails that I have exchanged with the counter-terrorism police and Belgian Secret services. They don't care if I see that I got an intrusion. At the opposite, they made everything to show it to me, probably to scare me and I was!

They made such intrusions about ten times, all the time, with the same modus operandi. I cannot call the police, because they take care to not make anything to let me call the police. I did not have CCTV, and there was no CCTV in my street.

I just begin to understand in 2013, that I was facing to a huge and very professional organization, including a large staff, to follow me, tap my phone lines, follow me with GPS, hack my computers and to poison me a first time... I could not move during one week.

The high police officer goes spend some holidays on the Syrian border. Yes! And I decide to meet the Belgian counter-terrorism police personally, with a first reliable witness who also knows the high police officer. They take my story, but they don't want to believe in any Intelligence in this story and in the Mossad.

So, another witness, close relative and working in the Belgian Services introduces me there. The Belgian Secret Services believes everything because they know these Mossad agents, not especially as Mossad, but as Israeli, involved in many other things. They can imagine that they are also Mossad agents and they confirm that the protection that I got from them is something that Belgium could not afford to anybody. But the Belgian Secret Service don't understand why all this. It's a big story with one man killed, one woman disappeared already and very high-level protection... Why all this? They ask me to find more evidence than my MP3's.

I go meet another Mossad agent, I know (all of them are Israeli lawyers in Brussels) and I record him also on MP3. He confirms everything that the first one said to me already, but he adds more information about the origin of this file. He says that this case began really in the 90's with another Israeli lawyer, VIP of Mossad, close to Golda Meir... and this operation was only against the same Belgian Police Officer. He asks me if I know where the paper files are. I did not know of course. He asks me several times if the first agent did not tell me more...

because there was something else, much more important. He says to me, and repeats it, that the police officer is very close of Fatah, but it's the only time that I hear that. He also says that a very high Belgian Prosecutor is involved in all this story. Finally, he says to me that I must be very careful in this situation.

I contact the Belgian counter-terrorism police again, but it's the same, they don't believe in the Mossad or in any Intelligence. They are not interested in my new MP3. I contact the Belgian Secret Service again. It's the opposite. They believe everything, but they ask me to find more because the Belgian Justice will not move in this case.

So, risking my life, I go meet another person, in link with Mossad. He is the one to have prepared the safe house for our coming. I record him too on MP3. In our long meeting, he gives me the name code of this Mossad operation. He confirms to me that some people within the Belgian Justice are involved in this story, but he doesn't give me their names, and since it was the hidden purpose of my coming, he shows me the hideout with all Mossad paper files.

I go back to the Belgian Secret Service, very happy with this new information but they are very disappointed to tell me that the Belgian Justice doesn't want to open an investigation on this story.

In my home, I still have the same intrusions, and I must contact my Internet provider, to understand some new big Internet problems. They check everything, and they find a very strange interference on all home intrusions and computer intrusions. I call the Belgian federal police specialized in the frequencies, and we must make the conclusion:

On all home or computer intrusions, the intruders and hackers wear... police or army radios! The counter-terrorism police and the Belgian Secret Service confirm immediately to not be the one. Of course, such very professional intrusions in the middle of the night... Belgium cannot do that. They don't have the means and the right to do it.

When the Belgian Secret Service gives this new information to the Belgian Justice, this one close immediately the file. They knew what this organization was.

The Belgian Secret Service is very disappointed and pushes me, and help me to open immediately a new terrorist case, for Intelligence, hacking and espionage, against police officers and militaries, in a terrorist case, and more than likely led by the very high police officer... I do that, at the end of 2013, but again this new Prosecutor doesn't move.

I still experience many problems in my home and strong pressures in the purpose that I leave the country... Suddenly (a new setup), I get a proposal to manage a Belgian website, but only, if I leave the country... for Madagascar. I'm paid to go Madagascar, and I go with my disabled son (25 years old, but with a mind of 6 years old).

+2014, we are in Madagascar, where I'm welcomed and financially helped by a Belgian couple. The man is a former lawyer in Brussels (again), and he knows my story with this alleged Mossad before I tell it to him! On the day after, he says that he is of the family of this important Belgian Prosecutor, that these alleged Mossad agents talk to me about, in 2011 and 2013! Of course, I begin to understand that I have been trapped to leave my country, but I did not know, who orchestrated this. This alleged Mossad, this Prosecutor, or the high police officer because he is the one to have paid my move there.

In September 2014, I didn't know it, but the last Belgian Prosecutor, who has the case opened with the help of the Belgian Secret Service, launch a police commissioner to begin to investigate around my former home. 3 hours after his passage, I get in Madagascar a tsunami of cyberattacks, very destructive. My computer (2500 USD) is out of service, and I lose a website that I take care for 12 years. It is completely disappeared, including the customer account. At this time, I don't know yet the reasons of this and the attacks last about 15 days, and they require very high skills, about the same of the NSA.

Suddenly, the attacks stop, and the commissioner emails me. He asks me when I'm ready to go back to Belgium, to get an audition. Of course, I understand the reason of the attacks. He also says and insists on getting all my computers. First, I could not work without computers, second, he just asks me this after all these attacks, and he says that they will not provide any protection to me.

I spend weeks, months, to think. I call the Belgian the Secret Service and my contact asks me also to come back, to allow this investigation, but she confirms that she could not protect me neither. So, I refuse to go back to Belgium since nobody wants to protect me.

At the end of 2014, the Prosecutor decides to close my case, again without any investigation.... And the terror attacks can begin in Europe!

Are you still, with me and in your seat? Let's begin...

- **Charlie Hebdo**, where among the terrorists, some hooded terrorists are not terrorists but seem to be militaries.
- **Hyper casher**, where among the hostages, some are not hostage but seem to be there to manage the taking hostage.
- **Verviers in Belgium**, where police equipment and radios are found in the terrorist hideout, while, never a terrorist uses police equipment or radio in their attacks.
- **The terror attacks in Paris**, where the first pictures are taken by Israeli people close to Mossad.
- **The terror attacks in Brussels**, where the first pictures are taken, by the same!

On my side, in Madagascar, I feel more and more linked to these attacks, but it's only a feeling. Indeed, I see in all these events a link with the police, the army, and Israel. In 2013, I was facing to intruders equipped with police or army radios, and of course, I was in contact with Mossad agents, and a very high Belgian police officer involved 100% in terrorism. I was more and more sure to have a link with all this.

On the same period, several times, I get very small cyberattacks, like wood arrows, launched from a missile launcher. I often give this image to my contacts, newbies in cyberterrorism. I understand these small attacks like a threat and the mean they have, to show me that they monitor me. Indeed, I have these attacks, when I live my home for a while for example.

Above, I was talking about the v-DOS company beginning, in 2012, his activity in cyber terrorism from Israel. These small attacks were coming from v-DOS, in Israel, which also began in September 2014 (same time as the huge attacks above too).

And suddenly, I get same small cyberattacks, with the same signature, but this time... ... from Ukraine where the MH17 is just shot down, by a real missile. However, nobody is sure about the ones who launched it. I remember this date because I wrote this to a relative. I was so surprised to get a small attack on this date and from this place.

+**2015**, we leave Madagascar for the Philippines and again, I get the same small cyberattack, from v-DOS, because I'm offline during this long travel. And some weeks later, again, when I visit another city in the Philippines where we could live.

+**2016**, after, the Brussels attacks, I decide to send my file to the Belgian Commission of the Brussels attacks.

I sent this file on **July 13**. 27 hours later, there is the huge terror attack in Nice, in France. A truck runs on the pedestrian just after the fireworks, 80 deaths. 27 hours later, ISIS claims the attack, but there is no strong link between the terrorist and ISIS. Me, neither, I don't see that I have a link with the timing of this terror attack.

On **September 21**, the Belgian Commission comes back from holiday, and they begin to read my story. The next paragraphs will become a little more technical, but it's very important for the next, till today.

On the same day, v-DOS or their cyberweapon has migrated to a new style of cyberweapon, 1000 times more powerful. Mirai botnet, the most powerful cyber weapon just born and they test their new weapon on a cybersecurity company in the USA, which is responsible for some FBI investigations in Israel about the v-DOS company. On **September 21**, he gets the reprisal, and he is fully impacted while he doesn't understand the incredible power of this weapon. At the same time, same hours, I get the last micro cyberattack from the former weapon.

On **October 19**, the Belgian police headquarters writes to me about my file in the Commission. 3 hours later, my other server, in DYN DNS, Manchester USA, is destroyed, like the one in 2014. But I have another server, ready, in the Netherlands and I open it immediately. Actually, the ones who are monitoring me since 2013, knew it and they knew that I will not lose my website. I understood this much later.

So, I insult, on **October 20**, by email, the high Belgian police officer, because I was sure that he was the one to have ordered the destruction of my server.

On **October 21**, the company DYN DNS, Manchester USA is fully cyberattacked by Mirai botnet, and all major websites in the USA are down. The White House must give a conference. I don't understand that I have a link with this cyberattacks again, that many people compare to a 9 11 through the Internet.

On **December 2016**, I want to use the holidays of the end of the year, to upgrade my webserver in the Netherlands and I discover something very strange. I ask the help of other IT's to understand what I guess on my webserver.

Mirai botnet is trying continuously to connect to my server, with incredible regularity, like a metronome. It's about +/- 200 connects attempts per hour. Again, it's the same as before with my image of a wood arrow fired from a missile launcher, except that Mirai botnet is the same as an Intercontinental missile launcher. So, Mirai botnet doesn't attack me at all, but provides me like, like a "frequency," a "signal."

Of course, On **December 2016**, I don't understand the meaning, the purpose of this signal. I see it only, and I understand it as a signal.

So, I call the FBI, since the USA have been the first target of Mirai botnet. We exchange 450 emails, including 150 received emails. They mount a team of 7 experts and 2 servers, to analyze what happens on my webserver. They search who is behind Mirai botnet, but like

the missile launcher of the MH17 -- another image that I often use--, the command and control center of Mirai botnet, can be moved like a missile launcher on a truck, and before the missile hits the target. Mirai botnet is the perfect cyberweapon which offers the best protection for their owners. Nobody can say who controls it. In 2018, Mirai botnet is 10 times more powerful, than in October 2016 and if they decide to point a big cyberattack against a strategic center, they could create hundreds or thousands of deaths.

So, FBI doesn't find nothing on my webserver. I was sure of that. These people are too much professional to let any trace. Then, I say to the FBI, that they must look at my story to find maybe the explanation, but they don't do nothing, in this direction.

+**2017**, January and February, Mirai botnet shows me that they follow my movements and what I do on my computer. I leave my house, Mirai botnet increases his connections on my server. I'm near the airport, and they increase them much more again. I go sleep, the connections level goes down to their normal level. It's the same, on my computer, if I work on this story, the frequency increases and so on... .. and it's much more today, in June 2018. You cannot imagine yet to what my server is connected! You will understand now...

May 22, 11h02, in the morning, Brussels time, Donald Trump is welcomed in Israel by Benjamin Netanyahu. I see the red line of the Mirai botnet's connections level, increasing to a very high level, on my graphics. This high level of connections lasts 4h30, and I try to understand. I think it could be a terror attack warning and I call the Belgian center of the terrorist threat, OCAM.

I try to explain what I see and what I understand on my server, especially, because Donald Trump must go in some days in Belgium, in NATO. They don't understand me, and they ask me a report. It's long to explain, and I spend hours. I send my report... and shortly after there is... .. **the Manchester bombing attack in the Arena!**

Moreover, I understand the link immediately with me, of course, with the warning from Mirai on my server, but not only! The attack occurred at Manchester UK, and the first big attack of Mirai botnet was against the DYN DNS company, in Manchester US! Two times "Manchester," it was not a coincidence. And about May 22nd, it was the 4th terror attack on a 22nd of the month, including the attack in Brussels, a way to claim the 4 previous attacks in only one warned on my webserver.

I was right, and I shout on the Belgian authorities because they never did anything with my file!

June 03, Mirai botnet draws a big peak on my Mirai botnet level graphics, like a sword... and 2h30 after it is... **the London bridge attack!**

Frankly, I begin to cry and to shout on these Belgian authorities. Manchester, and now London. On my email, to the Belgian authorities, I say that the fake explosive belts and the ceramic knives must be considered like signatures and that next time, the vehicle of the terrorist will be filled with explosive! (and they will do it in Spain, with the same fake explosive belts.)

In the Same time, Theresa May, says at the television, to the UK to not be worried, there is no link between both attacks! And me, I have both them on my webserver! I also write to Theresa May and to MI5/MI6, but nobody, like in Belgium don't answer to me.

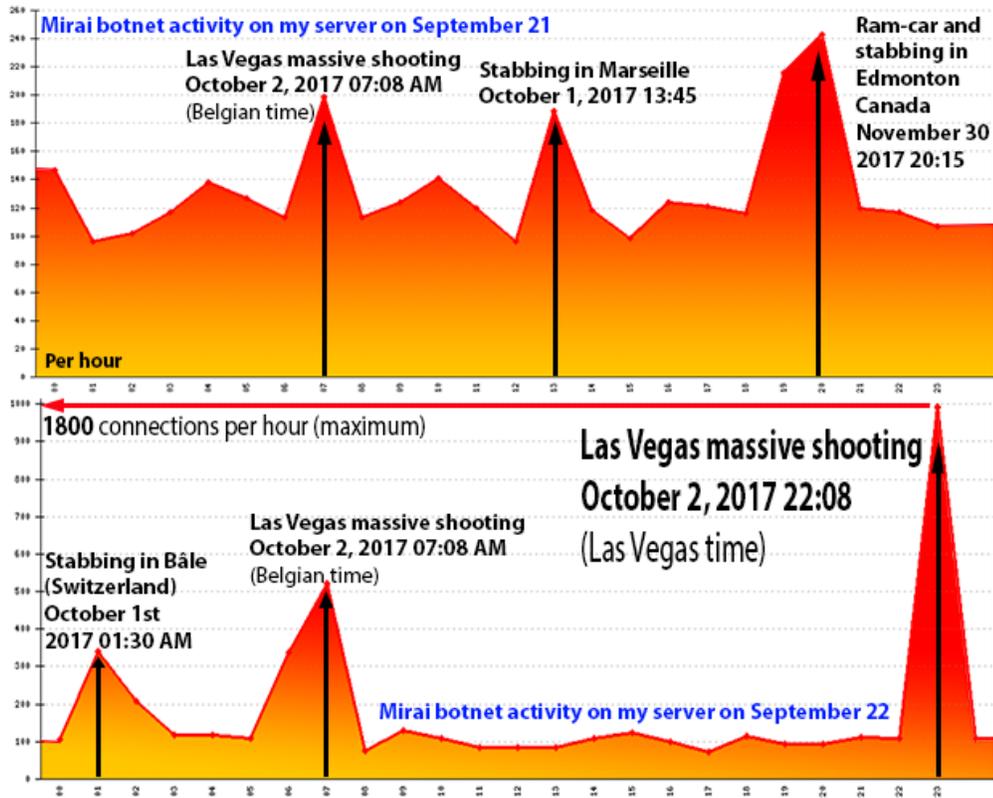

And in one year, I got.....60 terror attacks signatures. If I add the terror attacks since the beginning of 2015, it's almost about 2000 deaths.

There is the list.

- **Manchester** (UK), *Bombing*. The terrorist was *Trained in Belgium*.
- **London**, ram car and stabbing attacks signed 2:30 before the attacks, then a new signature identical during the claim. *Fake explosive belts and ceramic knives*.

- **Paris**, an *idiot attack* and failed against a police car.
- **Brussels** a missed and *idiot attack*. An incendiary bomb in a train station.
- **Halamish** (Israel), a *stabbing attack by a Palestinian*. Signed 1h40 before.
- **Hamburg** (Germany), a *stabbing attack by a Palestinian*. Signed 1h before.
- **Levallois - Perret** (Paris), a *rampage attack* against militaries. Signed on the same day.
- **Barcelona** (Spain), several attacks on 3 days, *explosion, stabbing and rampage attacks*. Terrorists carry *Fake explosive belts*. The attack signed shortly before the first explosion. A terrorist received a phone call from the police 2h before the rampage attack. The Imam who trained the terrorists had a *second life in Belgium*.
- **Brussels and London**, Two failed attacks and *Idiots Against police* officers.
- **Edmonton** (Canada), *Stabbing and rampage attacks*. Signed at the exact time.
- **Basel** (Switzerland), *Stabbing attack*. Signed at the exact time.
- **Marseille railway station** (France), *Stabbing attack*. Signed at the exact time.
- **Las Vegas** (United States of America), *massive shooting with automatic weapons*. Signed at the exact time, three times in different time zones. Claimed by ISIS, but not related to ISIS. The killer suicides himself when he has finished, but he let in the room some note about ballistic computing. Was he a professional?

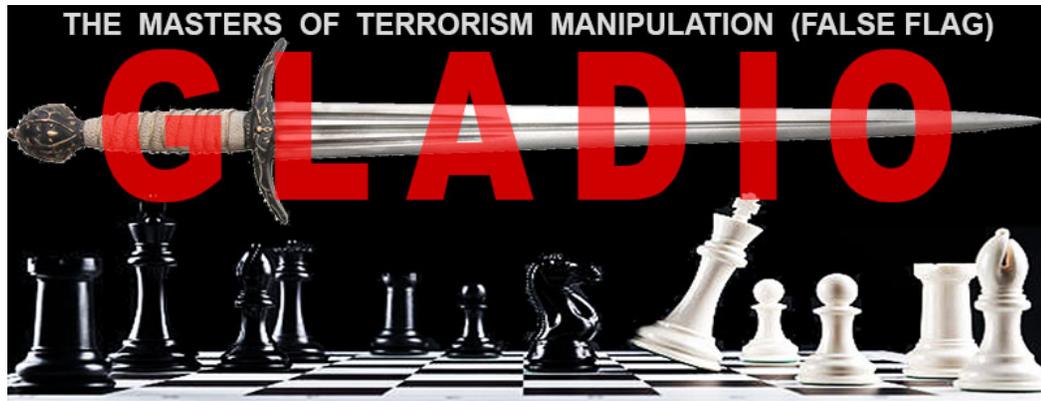

- London (UK), *Incendiary bomb*. Signed in real time.

Identification of the terrorist organization

In mid-October 2017, the news talks in Belgium (by chance ?) about the case of *Killers of Brabant*. I also have 2 important phone calls on the same day; A call from a Belgian federal Justice agent; And another call with a former agent of this organization. I recorded these calls on MP3, and it appears that the organization, I was fighting for almost 9 years is GLADIO.

GLADIO is an emanation of NATO and the CIA, whose first vocation (Wikipedia) was to defend Europe against the USSR. GLADIO finds its staff, most often without giving them a choice, within the army, the police, intelligence, but also, bandits, terrorists, the unbalanced and extremists of all sides, and therefore "simply known" to the police and therefore Identified.

But in the years 70-80, with the end of the Cold War, GLADIO turned to terrorist operations across Europe, whose *Killers of Brabant* In Belgium. It's in October 2017 that the Belgian population discovers that the *Killers of Brabant* were some former members of the Belgian special forces. Immediately, the Belgian Justice attempted to refute the new testimony. This demonstrates again the total unconsciousness of Belgium about terrorism, which GLADIO generates throughout the world.

In the years 90, Europe demanded the dissolution of GLADIO, but these two phone calls tell me that GLADIO has never been dissolved, and this is also confirmed by many international experts.

GLADIO, in the years 90, became much more discreet and they have spread across all NATO countries, to become the most secret and the most powerful force in the world with unlimited access to the means of intelligence, espionage, surveillance of NATO, CIA, Mossad...

I understood then the function of the high Belgian officer. He is more than likely the head of GLADIO since Mossad told me that the high officer was already linked to September 11, 2001. This certainly allowed him to gain importance within GLADIO.

Moreover, its position and its power even within the Belgian police, allow it to be in the best position to recruit, even by force, new members of Gladio. Moreover, the one who is at the base of this whole story and who seems to have extraordinary means is still the high officer.

Finally, for choosing me, to record all the operations of Gladio, without having to account to anyone, is still the high officer, who can only be at the head of Gladio. This has been confirmed to me, on the telephone, by the former member of Gladio.

Second Series of attacks

- **Malta.** The murder of the Maltese journalist, Daphne Caruana Galizia. Signed in real time on my server. The journalist was also murdered because she was on the trail of Gladio, Dixit the Gladio's expert, Sibel Edmonds. And so, I am the pawn of Gladio, on the chessboard of terror, but I am still alive, which confirms once again, that for having chosen me for this role, the high officer must really be the leader of Gladio.
- **Manhattan** (United States), a ram car attack with *false weapons* (toy). Signed in real time.
- **Texas**, church (United States), a *massive shooting with an automatic weapon*. Signed in real time. The killer, *a former military man*, commits suicide.
- **Blagnac** (France), a *ram car attack*. Signed in real time. The terrorist's brother is working for the police.
- **Argentina**, the missing submarine... that has not disappeared or exploded (according to the USA), but that would have been hacked. Signed in real time over a week.
- **Saint Petersburg** (Russia), an incendiary bomb explosion. Signed in real time.

- **Kabul** (Afghanistan) the attack at the Intercontinental Hotel. The attack is very well prepared, and the guards received the orders before the attack to not search cars.

... Another chip because from now the attacks will start with one of my actions.

- **Gent** (Belgium), a *stupid attack* by an Afghan, *against police* officers. Signed in real time. This attack has been executed exactly 1h after I warned the authorities of a significant threat visible on my screen and that had started a few hours before. It was the first time that after an alert on my part, the attack occurs, exactly 1h later, even failed. I had noticed and pointed out to my correspondents, without understanding that this would henceforth be the case, for all the other attacks that were going to follow.

However, this immense activity of Mirai on my screen was intended to draw my attention to anything else. This important activity of Mirai began at the very minute of the opening of a conference against the chemical weapons In Paris, and this will also mark the beginning of the chemical weapons attacks.

In fact, I do not quite realize it, but Gladio has just changed strategy completely with itself and with me. It's already six months that Gladio records his attacks on my server, first, shortly before they happened, and sometimes on the attack's claim.

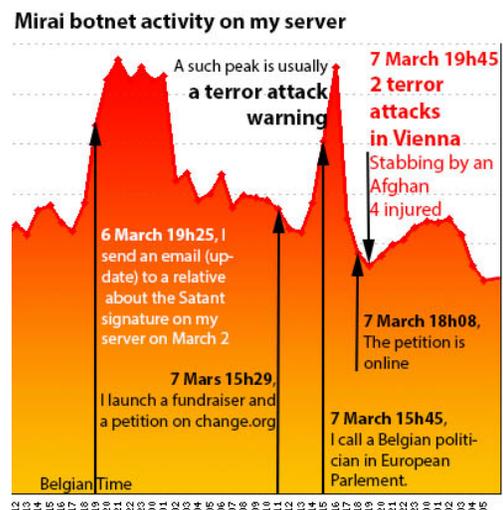

Now, Gladio is going to choose to place me as the trigger of all the attacks, choosing one of my attempts to alert the world, as the starting point for a new attack, even if at times these had been planned by them previously.

I understand this change of position, as a way to make my warnings more convincing.

I have with Gladio no direct contact except via Mirai botnet with which, they communicate with me and with the rest of the world since I systematically transmit what I see. I must, however, add my personal decoding, to what Mirai tells me, insofar as I am the only one who can do it. And that's what would turn me more into a messenger of Gladio.

- **Kabul** (Afghanistan) *The ambulance bomb attack*. Signed in real time. More than 100 deaths.

- **Leicester** (England) *Explosion*. Signed in real time, started when I published my story.
- **Washington** (United States of America) A chemical attack by poisoned letter at a military base American. Signed in real time, started when I sent an email to Edward Snowden. An American base because Snowden is American. No dead.
- **Kabul** (Afghanistan), a *car bomb attack* against an Australian convoy. Signed in real time, started when I sent an email to Julian Assange. An Australian convoy because Assange is Australian. This operation hid the beginning of the Skripal operation.
- **Vienna** (Austria) *Double stabbing attack*. Signed in real time, started when I launched a petition and a fundraiser.

- **Salsbury** (England) The ***chemical attack*** against the Skripal pair + *murder* of his friend. Signed in real time for 15 days and this signal began when I sent an email to Julian Assange.
- **Tihanges** (Belgium) *30 Cars in fire in a nuclear power plant*. Real-time signed attack and following my call to RT television.
- **Carcassonne/Trèbes** (France). *Deadly hostage taking*. Signed in real time, because I wrote that the police and military were seldom killed. This operation hid the Kemerovo's case.
- **Kemerovo** (Russia) The *Fire attack of a shopping mall*. Signed in real time because I called the RT Television. This operation must be linked to the *Cars in Fire* in Belgium and with the last tweet of Julian Assange about the timing of this fire. He lost his Internet when he tweeted about this fire.
- **Munster** (Germany). *Ram car attack*, started while I was writing to the President of this region. Signed in real time.
- **Syria. The chemical attacks**. The third chemical attack in some weeks, just after the conference in Paris. Signed In real time.
- **Algeria**. *A first plane motor explosion* when I sent an email to a large number of authorities. 257 dead! Signed in real time. Very visible on my server. Horrific.
- **Mali**. *The terror attack against a United Nations center*. The attack started when I sent an e-mail to the UN Secretary-General. Signed in real time.
- **USA**. *The second plane motor explosion*. The attack started when I sent a second mail to the UN Secretary-General. Signed in real time.
- **Afghanistan**. *A double bombing attacks*. The operation started when I put my first video online. Signed in real time.

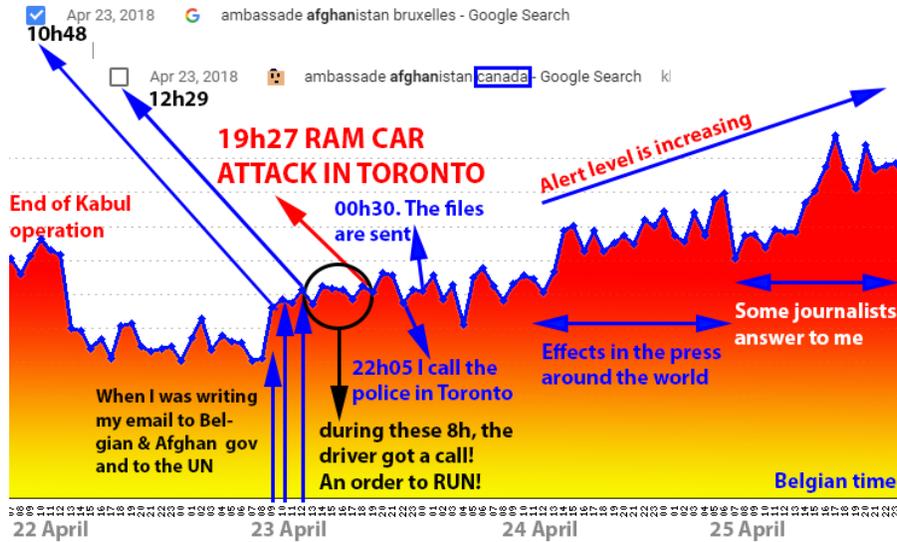

From here, I must give more details since GLADIO, is definitively entered in war mode.

So, there was this double attack in Afghanistan, and I wanted to write to Afghan authorities. Immediately I see that the GLADIO activity is increasing, but I continue. I have to tell what I know, even, if I don't get any answer. So, I continue to write. When I begin to write such report, in French or in English, I need hours, but during this time, GLADIO, reads what I write and they follow, every minute, like now. If I stop for a while, I see directly the frequency of the GLADIO signal going down.

So, not only they show me that they follow and read me, but they have time, to prepare the next attack, and it's really what they do.

When I have finished my emails, I begin to add the recipients. My email was in French, and I chose the Afghan embassies in Francophone countries, including Belgium. Since I don't have many Afghan embassies in Francophone countries, I chose to add the Afghan embassy in Ottawa in Canada finally.

I will understand it later, but GLADIO, chose at this very minute, to launch a new attack in Canada, Toronto. I don't know it of course, and I send my emails. Seven hours later exactly, I see the attack in Toronto. On this attacks, GLADIO made something very special; they gave, of course, all instructions to the terrorist, but the scenario that they gave to him was directly coming from the video that I upload two days before. Indeed, in the video, I gave a sample of attack and the information, that I see on my screen. Even the number of deaths was almost the same (10/12 in the video). Besides this, the terrorist also used a fake weapon and also asked to be killed. Everything was explained in my video, where I was explaining the modus operandi.

GLOBAL TERROR SIGNAL coming from GLADIO HQ (LEAK)

Terror With love from... the center of Europe.
9 ATTACKS From April 20 to April 30, 2018. **MORE THAN 100 DEATHS**
 Signal initiated (LEAK) by GLADIO and recorded on my web server only.
 Signal existing since May 22, 2017, Manchester, Arena bombing

INTELLIGENCE CONCLUSIONS – MAIN TARGETS:
 op1, CELEBRITY, op2-3 massive & KIDS, op4 WOMEN,
 op 5 KIDS, op6 PLANE, op 7-9 JOURNALISTS, KIDS, THE UN FORCE, massive
 Why the most victims are kids? To touch you.
 Why the journalists? Because they don't publish the truth
 Why the United Nations? Because no reaction to my warnings
GLADIO will not stop until the world will know

+/- 50 ATTACKS recorded in 2017 -- 1500 DEATHS (in the order): Manchester, London, Paris, Brussels, Halamish (Israel), Hamburg, Levallois-Perret, Barcelone, Brussels, London, Edmonton (Canada), Bale (Switzerland), Marseille, LAS-VEGAS, London, Malta (Murder of a Journalist), Manhattan, Texas (church), Blagnac, Tehama (California), Argentina (submarine), Saint-Petersburg, Kabul (Hotel), Gent, Kabul (Ambulance), Leicester (UK), Whashington (chemical against military base), Skripal (UK) + murder, Kabul (convoy), Vienna, Tihange (Belgium), Carcasonne/Trebes (France), Kemerovo/Russie (Fire 41 kids killed), Munster (Germany), Syria (2 chemical attacks), Algeria (Plane), Mali (UN force), USA (plane), Kabul (2), Toronto (Canada), Shaanxi (China), Libya (Plane), Afghanistan (3)

1500 DEATHS and THOUSANDS OF VICTIMS in 11 MONTHS

I immediately call the Toronto police to tell all this. They are very interested in my information. The special agent that I have on the phone thanks me so much but at the same time, I know that more than likely, her direction will not investigate. She asks me a report. I write it and send it. Like I said, I never get an answer from the Toronto police, and this makes GLADIO very upset.

Since I'm sure to not get any answer, I write to journalists, and I get a contact with a video-journalist. We exchange several emails, and she is very interested. She proposes me an interview on May 1st, with other journalists, and we continue to exchange emails. I guess that she takes contacts with some other colleagues, who warn her of some possible danger, and she becomes scared. I read it in her emails, and GLADIO read it also.

I guess that GLADIO is very upset and the day after, there is triple terror attacks in Afghanistan. The first one front the USA Embassy is to attire journalists. The second one, it's on the same place, a video-journalist with an explosive belt explodes himself, killing 12 journalists. The third one kills about 12 kids!

Subsignal from Mirai Botnet (09.236*) for the video journalist in TORONTO from April 25 to May 01 => AFGHANISTAN ATTACKS

After, I see that I get a new huge continuous alert and I see that the connections on my server are mainly coming from Toronto. I think that GLADIO will attack Canada again. I warn during several days the special agent in the Toronto police, and finally, she asks me to stop to warn her. Of course, GLADIO doesn't like that, and they launch a triple attack against the police. Two are simultaneous in Kabul, and the other one is in Indonesia... Why Indonesia, because I just book at the same day, a flight ticket to go there to renew my visa in the Philippines.

But before to go in Indonesia, I had to spend one day in another Philippines Islands to get another paper. GLADIO knows that, and during this trip including one night, GLADIO doesn't move anymore, but they follow my partner and me minute by minute.

When we are back in the home, I answer to another journalist, who seems to have doubt about my story. I reply to him that if he stays aggressive like this with me, I'm scared that another attack will occur. 6 hours later, there is the stabbing attack in Paris!

Since GLADIO is in war mode, they don't stop, and there are 7 terror attacks in Indonesia. Since my worry at this time, is also my son in the Philippines, the attacks in Indonesia are made by whole families; the parents and their young kids!

I'm very worried about this situation, and I begin to talk to my partner because I think that GLADIO wants to tell me something about these multiple attacks in Indonesia before we go there. My partner also becomes scared because she knows my story and I know GLADIO is probably listening to us. On the same day, they stop the attacks in Indonesia, and they go back to put the mess in Afghanistan.

So, we keep our travel, and since I know they read me, I put on my screen a small memo to tell them the planning of the trip and asking them to not launch attacks in Indonesia or in our plane. I know that they know already everything since they read my screen 24/7, but I prefer to repeat it, to be sure.

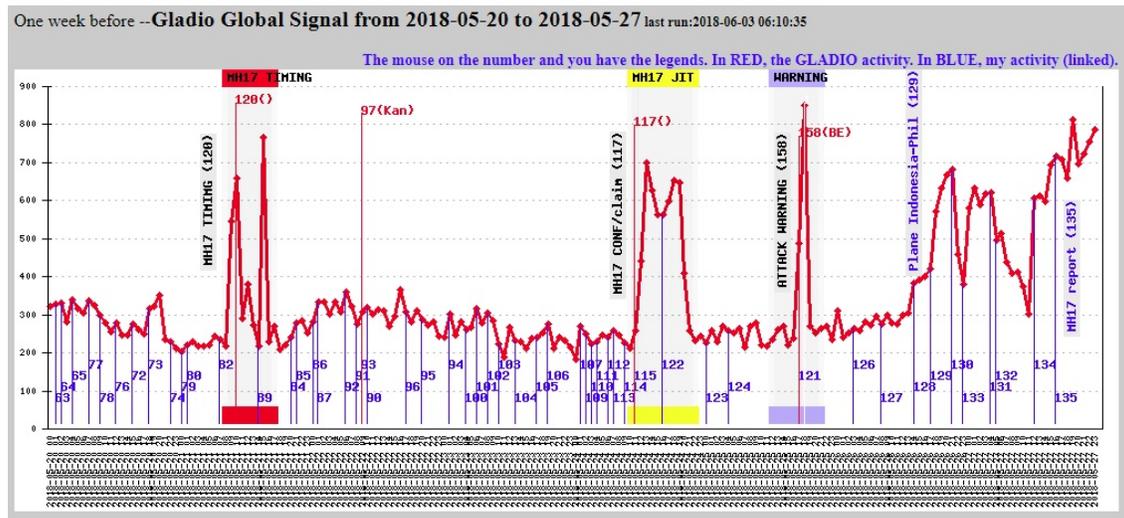

Indeed, in the past, I did that already, and I asked them one or two questions and, I propose them to answer to be by a peak up or down of yes or no, and they answered it. Another time, a reader asked me if GLADIO compares itself with Satan, and GLADIO answered by the sign of Satan (Hail Satan, 3 fingers) on my server, starting at the same time, the Skripal operation and another attack against the Australian convoy, in Kabul. So, I perfectly know that they read me. Their signal becomes very interactive.

But, to monitor the signal from Gladio when we are in travel, I create a webpage with the GLADIO activity, updated every 5 minutes. Actually, it's updated every second, but I update the page every 5 minutes. On this page, I write a short summary of my story, and I explain the meaning of the 2 graphics.

Indeed, there are 2 graphics. One is about the GLOBAL Gladio Signal. It's this signal which changes the most often for the attacks. There is a second graphic with a part of this signal. This signal is usually more personal. It's more about my own activity. If something is about me only, it will be shown by this graphic. If my activity is about the communication of the GLADIO activity, both signal can be updated, and if the event is about GLADIO attack, it will be in the first graphic, except if GLADIO wants to hide the attack or the ongoing operation. They did it for the Skripal operation. On the ultimatum, I saw a peak, and I understood that I have to find something and I found it in the sub signal. Between GLADIO and me there are only these signals, but with the experience, I can read them like emails.

So, during our travel, they stopped the attacks again, but they were monitoring us minute by minute. They really don't care, if we have or not the Internet, mobile connection or not, in mobile mode only. I don't know how they do, but they don't need anything; even if we are in the middle of the sea or in the plane. Sometimes, I see a peak on the graphics, and I don't understand it. So, I try to find the explanation.

On May 21, just before we go in Indonesia, I see that GLADIO sends 3 huge alerts on my server, on the main signal. First I understand, that they just launched a big alert for the 22nd of May, their preferred day and the anniversary day of the first terror attack warned on my server. I warn everybody, but it happens nothing.

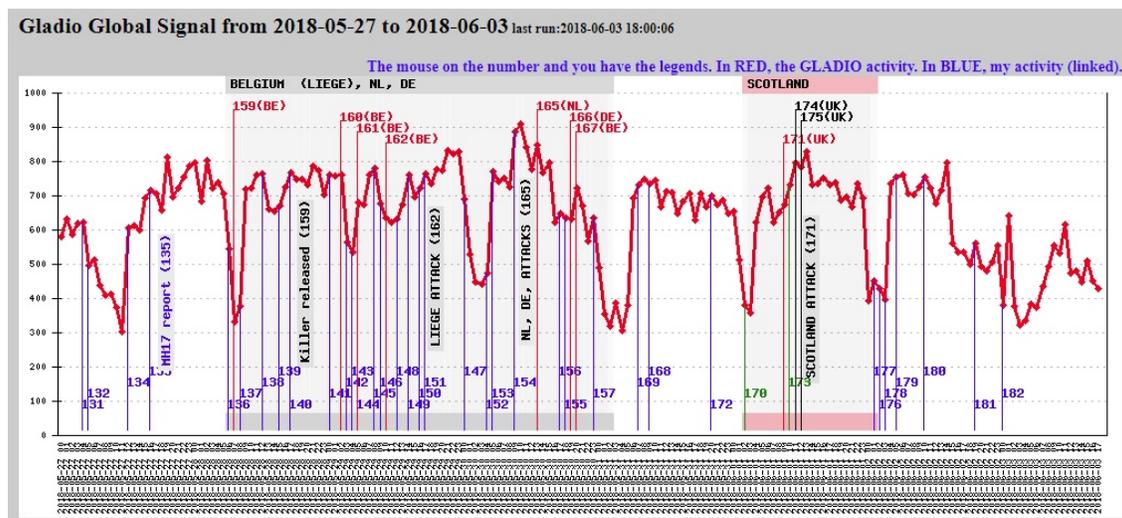

Last time, this happened, it was with the big fire of the mall in Russia killing 41 kids; with a part of the logo of this mall on the graphics, on my server. But for this May 21, I don't see nothing anywhere, but I know that I will see the reason later.

We leave the Philippines and on May 24, appears again, a new big signature on my web server. This signature has the shape of a big M, and I understand it when I look at the news. M for M17 and the conference which just occurred in the Netherlands. So, I understand also, the 3 peaks of May 21, it's the timing of the attack of the MH17.

Even, in travel, I write on my mobile a long report to the Netherlands police to tell them my story and to warn them, that if they don't take care of my file, GLADIO could attack more and more [the police].

I just sent my report and GLADIO replies by a very huge attack warning on my server, but they wait for that we are back in the Philippines to run the attacks. On May 29, two police officers are killed in Liege, and a teenager and a former prison mate of the killer. On May 30, there are two new attacks in the Netherlands and in Germany. One police officer is injured, and a police dog is killed with an ax. GLADIO waits for the result of these attacks and 1 hour after the second one, ISIS claims the attack in Liege. On June 1st, 2 police officers stabbed in the neck in Scotland.

Today, I just read that the Netherlands say that for now, they don't have enough evidence that Russia has launched the missile to the MH17.

There are the snapshots of the graphics, today, June 3rd, on my server and you can read them on www.gladio-activities.net

Conclusion

So, I think that this story shows enough evidence that I have a deep link with GLADIO. I know it's incredible, but it's like this and the main reason, it's because of the high Belgian police officer. We know each other, and he chose to use me to record all signature of their attacks, and because he was sure that I will try to denounce everything, and that I will not give up, even if I risk my life.

On the other side, since I'm their pawn in the middle of the terror chessboard, they monitor me 24/7, probably, to be sure that nothing happens to me.

Indeed, I see only one reason to have leaked such information during so many years and to trust that I will record everything. The high police officer wants to destroy GLADIO and their customers, probably, before GLADIO get the order to launch massive chemical attacks in the Western countries.

I cannot imagine other reason than this one, especially, because I know that guy. It's 100% him. He infiltrated the Islamists, the Belgian police, and GLADIO and now, he wants to run GLADIO in the reverse mode, before we arrive at a WW3, prepared by NATO, against Russia. So, I try to warn the world, and I know they will continue to attack. On the other side, I'm almost sure that if I give up, I'm a dead man!
