4th year is annoying because step 2 CS and ck are required by Sept so not early match friendly. If you want to go to a school that is ONLY a medical school (with a tiny PA and CRNA program) and not part of a major university, they really

teach horribly, all self learning and errors are common in lecture. Guest lecturers for lots of topics who claim they work

in other schools, but you're dead set on being a doctor, the Caribbean provides the chance to gamble on yourself and make a bad bet. al. Despite being in Texas, most conservatives in my class feel pressured to stay silent or risk being alienated

from the rest of the class. I've never felt out of place or uncomfortable. I find the perspective important especially in the south. Don't be deterred

by what other students have or how much change we can create in partnership with the administration, but I do like the school. The school is average. They do not do the best job of teaching for Step 1, a lot of that preparation had to be done on my own. The school has a lot of science, many opportunities to do research, strong emphasis on service, diverse patient population. If you don't find things to do, you're boring or lazy. They tend to recruit well for the student body - about as academical

roped. Go to lecture and zone out first year because the year is pass-fail: you don't need to hide and cram th

on-primary care specialty. Also, it is incredibly expensive for a crappy school with zero name recognition  
Is go VCOM VA had an excellent reputation when interviewing at ACGME programs.

ap 1 questions, which means you can ignore lecture and just study for Step  
Responsive administration  
Tiny cl  
on one with Attendings/residents and never compete for procedures, patient experiences or have to deal wit

singer will lead to many bumps in the road. In addition, they are planning to add several graduate programs v  
ts identity and needs to provide increased resources and advocacy for students, especially w/ regards to resi  
rs than you can count. No financial aid unless you are African American. Lectures are painful and awkward  
where if you get a haircut people notice the next and tell you it looks nice. People share resources like anki

cialties lacking residencies here (don't know them off the top of my head).Networking with this school and al

at places people with non medical "advisors" that don't know the first thing about med school, the match, or r

ve us free weekends, and most of our lecturers (all but 1 really) are pretty understanding. Lectures are recor

tually hold a lot of sway in class selection; odd numbered grad classes are full of more non-trad-esque folks  
nd within each college, we are broken up into groups of 5 called molecules. You get really close to the peopl

who ended up getting fired last year, so my advice may or may not be accurate for the current state of affairs  
none have ever seemed depressed. Stressed out sure, but we take care of each other. We get drinks every  
w why it is so. It's absurd. I can't help but feel like I'm being ripped off every single day, and it terrifies me to t

tion issues (which some are warranted), but it provided me with a good learning environment. Many of my fri

remain in classes until 5/15 which is super late for 2nd year of medical school. They have a hard time unders

I about drinking/other things and show it off. I know quite a bit of people who drink under contract anyway and  
education. Haven't had any experiences with malignant faculty/attending. People are super kind and the en  
time making friends or wouldn't like that enviroment. Tbh most of my fears were pretty much mitigated as soci

ers underneath the surface. Clinical skills are prioritized. Not enough study time for Step 1. Spirituality is a pa  
le statement but a majority of students drink and there are plenty of parties. No one polices your sex life. The  
a better school I would go there. The area we live is hot as fuck and summers suck.

achers to mediocre. All lectures are recorded and notes are available so this wasn't a huge deal for someone  
or fourth year is never explicitly detailed, and the students figure the majority of it out on their own. Much of tl

ons. The only people I have really enjoyed are the Admissions staff members and the simulation lab employe

effective. Admin is awesome about accommodating and supporting extracurricular things, but the curriculum

tiety from urban poor to wealthy suburb, and each place had its strengths and weaknesses. I was able to get

you, very little help with regards to board studying, giving shitty advice, and telling people not to take USMLE

re definitely a few to hang out with if you want to gun. There are also way more resources for primary care tr

tration is completely unreceptive to student feedback and it can be extremely frustrating, though.

feel like they want well-rounded people with interesting life stories, not just cookie cutter students. We matc

inical years and the lecture quality leaves much to be desired. Clinical training is exceptional from M1-M4 with the DO school has a bunch of issues. Very few people in administration are "understanding" or try to help you. Faculty sucks. About 25% of the teachers are stellar, and the rest simply suck and shouldn't be teaching (but I'm not sure they are offering students and there continues to be a drive by Ken Langone to make the school tuition free. I am not sure with watching lectures on your own then getting into groups and talking about it. If it's organized anything like that it would have had better faculty.. Otherwise its fine. Honestly, if I had to re-do it again I'd go to my own state school to save

money and hang out with a core group of friends for the longest time. It definitely took me longer than others to do this. I also feel like we are "ranked" in US News and World Report but that's because we intentionally don't submit to that organization. V

is frequently impossible to contact. Administration has no actual concern for the students. Administration forces you to finally joining 2017) and administration constantly messes up documents, financial aid, etc, but they're supposed to be better.

I think that the bad things are more universal to medical schools and not specific to Rush. They do a good job of preparing you for this school and matured in ways that I wouldn't have imagined. I have received a good education and met people who

are coming from a state school. Ones who work hard can go far and match well even in competitive specialties.

They care about our mental well being and try to cut the bullshit out as much as they can (maybe too much due to probation

being removed, it was a shame our dean of student affairs got removed and it remains to be seen how things play out in the future.

The culture that exists pushes us all to be better, but everyone is willing to help everyone do their best. It helps you if there are people who are about standing out, come here. most of my classmates are really chill, and no one really has dreams of becoming a doctor.

They do offer more full rides to students of color, but that being said, each class is about 270 people and there are a lot of people who keep up this is not the place for you. This place has freedom to learn independently but that can be easily abused.

Transparency is a key aspect the admins have looked to help in the past and help with quite a bit.

It's not a bad school. It's designed so that it will filter out all weak students, survival of the fittest system at its core. you hate it but it's not your fault.

Classes are set up, I really don't like the curriculum because I feel like my learning was sacrificed for the sake of making the school look good.

It's very community oriented and everyone there is so loving and caring for one another. There are cliques here and there but it's not as bad as you think. Living with a poorer pop and hospital, you have to be able to roll with things and enjoy yourself. Downstate has a lot of

very good faculty but also a few very bad recurring ones. Rank is calculated by semester and made known to us, above Penn). The school is unpretentious, hard-working, and thriving. I don't think I've met a single student involved in politics. That can be good or bad, depending on how obnoxious you find politics in general.

Environment for the students, you really feel supported. Also Lubbock is a really nice town despite the small size.

many wonderful friends during my time there and I was impressed throughout my time how much the faculty

The letter hostage over us and everyone is seriously afraid. We also got blindsided with a change to our rotations with med schools opening up in the same area so clinicals will be fucked in the future (more than they already

that has its pros and cons for some people. We do get exposed to a lot of the bad parts of medicine because

also amazing in that you can get exposed to all different types of practice: academic vs private which really helps

our back most of the time. Lots of great mentors. Not a ton of research if you're going for super competitive spots

near the school. Preclinical neuro and cardio are taught very well. Can't imagine better neuro courses. Pulmonary

if you have multiple choices consider what works best for you. It's a lot of work, but you also learn a lot. Plus you have a great time in med school but not necessarily match MGH derm it's a nice place.

I have done cool things before med school. We also have a great match list even though we don't necessarily match hard and tell you it's a leader in x, y and z. It's all bullshit. "We are leaders in incorporating TBL into the curriculum"

so is one of the few which has an emergency psychiatric service. Surgery is known to be tough. Population is

ssed step 1. This sets up students for failure, IMO. They also have all sorts of red tape in order to take the st  
medical students in our student affairs office), overall traditional curriculum but with some incorporation of ne  
d to be your own advocate for administrative concerns. That said, the student body has all types: lots of non-  
akness. Third and fourth years are great. Turns out Arkansas is actually quite a fun state to live in.  
or long. Onsite teaching hospital is coming in the next few years. Generous scholarships. Awesome adminis  
tuition 145k total. Avg step score for the current M4 class is 239 and we match pretty well.

es are split up between 8-10 lecturers, at least half of whom have a significant language barrier present and  
ces and amenities in Peoria and Rockford are very limited. Several essential admin offices (financial aid, stu

year is more streamlined and better than the last. (They tend to act on feedback quite well)

n their desire and attempt to help students succeed, but they can be capricious and malicious to students the  
clique-y. I was originally up for doing class-wide activities like happy hour or game night, but I seriously do not  
ally do love my school and recommended it to anyone -- I can't underscore enough the amount of opportunit  
phasized so you should at least tolerate it. Pittsburgh is a fun city but may not be your thing if you're from a l

because administration will make you go between the downtown and suburban campuses daily for no good

secret gem of the U.S.. My peers and administration are so supportive. I really don't know how another schc  
n, southwestern, Baylor, Harvard. Baylor and Uva had by far the happiest students (including M3s). Apply to

o little resources. New Mexico is a great state that needs doctors and greater access to care. Because we si  
ense than others), but this is probably true of other schools as well. People do form cliques as time goes on,

school kind of sucks. Had I known it was this much of a big deal I would've tried harder/done better on my A

ent encounters and accelerated didactics. M3 starts May of de facto 2nd year. Innumerable opportunities for

ources for research and investigating subspecializations. Weaker primary care training compared to some ot

e place to be. It's very high stress if you want to be in the top because the top of the class could have gone to

ation does its best to help. It isn't perfect but they try a lot more than other schools.

es who would like my school. The community is UNIQUELY supportive and laidback among medical schools

ore primary care. We do match competitive specialties, but would like to see more. This may be that WVSOM

dependence. During the clinical years, the fact that almost everyone gets Honors is really nice. We also don't  
rusted, than at any other med school in the world. You have time to work on other projects, run a side busine

lly take care of us since we are all they have. The deans know your name, say hi and listen. If we ask for reas

write our block questions but its usually the department chair who's ideas of what was taught isnt actually what

ake the most of the opportunities they provide. But you must be OK with that going in. Of the Caribbean scho

d/persecuted at any turn. Lecturers will frequently talk badly about republicans and even allude to republicans

wn. If I wanted to do ENT at harvard, Creighton would not be the best place for me. But for a future pediatrici

lly strong as an average MD school and much more chill in tone. Still, should probably go to non-new USMD s

the most efficient way you possibly find, because you just need to pass. Rotations in second year is when you l

class size (64) Great match lists Step 1 above national average Rising national profile Best weather outside of Ca

lecture decks and it isn't nearly as competitive between classmates as I thought it would be, especially secon

ded and they are under no illusion about us not wanting to go. The new curriculum is a toss up though

who really throw themselves into their ECs, even numbered classes are full of younger, more high-octane ac  
e in your college and esp in your molecule. All 5 of you in the molecule share one excellent advisor; the advis

s, as I've been told by the classes below me that things have marginally improved since he was forced out. Bi  
weekend and make it to music festivals when we're lucky. It gets cliquy after MS1, but come MS3 I met lots  
think about having this huge debt burden. Luckily I think I'll be able to pay it off with my chosen specialty but of

standing that as first and second year medical students we need to be prepared for boards, and not "what did

d they're just smart about it. Also, the religious aspect is also not too bad--just show up to Chapel. A good portion as school started. People here are pretty normal, friendly, and very very nice! occasionally you get a gunner part of the experience but most students here are not crazy-religious. Not difficult to make friends, but it's a little administration does not drug/alcohol test unless there is a specific reason that would jeopardize your education

e like me who prefers to study alone instead of attending class (which isn't mandatory). The culture of the school his involves gathering information from peers and students in the class above. There are some great professors

1 folks aren't too receptive on feedback. All lectures are live-streamed and recorded, which has been AMAZING

3 because our school's average is absurdly low. There's a lot of MD bashing especially from the OMM department

h very well for not being a big name school and I think it's because we are socially well-developed

Without any doubt. Administration is always open to feedback, though sometimes slow to make change happen. You out. Their excuse is "in the real world this is how it's going to be. We're preparing you for that". Third year is sure that is common at lower tier schools). Honestly I had a lot of fun first 2 years. Our clinical rotation situation from CA and was worried at first about coming to a far away place for med ed but NYU has treated me better than the practice runs they did with us this past year, it is a huge waste of time for anyone who can read and understand

Even though I still don't know everyone in my class (I don't even know some people's names), but it doesn't bother me much. We'd be solidly in the middle tier of med schools based on NIH funding and graduate placement.

It's nice to sit through lectures on the dangers of burnout and depression but is totally uncompromising when they're supportive and make you genuinely feel like they want the best for you and to help you succeed.

People who make positive impacts on the world. The one overtly negative thing about Rush is the administration

Even though the students around you do well and we recognize that at SLU. Also we work with the underserved a ton so that's Harvard or whatever. It's half really nice because everyone's supportive and relaxed, but also can be a little harsh with most 10 black students. The administration has been amenable to implementing changes we've suggested,

By the time you leave but it molds you into someone who can take a myriad of shit thrown their way and still cope. Lack of "efficiency" in our curriculum. Students are really stressed out all the time and first year was NOT relaxing at all. It's in no way as clique-y as high school. We have some fun activities and we are generally a social school. Very

o students even though classes are technically "pass/fail/honors". Highly recommend my school.

2. Temple's commitment to North Philly is genuine. If you're here, you will be out in some of the poorest/most

ons putting us 3 hours away. This happened AFTER already signing leases/taking loans. We only have 7 days

ie of the city and it's history: underfunded clinics, destitute patient populations, and extreme cultural divides be

m, immune, and heme are handled horribly. Plenty of time given to study for step 1. Clerkship experiences ar

s the price of the school is nice, and if you are out of state you can apply for in state tuition after a year

ly have the best scores. We have a lot of good residencies so the residents are always super smart. I really h  
ulum" - total BS, we are average at rate of incorporation probably and its the worst fucking part of medical sch

erved between multiple hospitals in the area allows for good clinical exposure when working w/various demog

·trads with families and age 28+, a decent number of "gunners," but plenty of more low key helpful peers who
