Your investment for the Water Economy is too very good success for the Thai-people and your business.

Time, when we open the first water tanks, we can therefore construct primary Industrial zone's and therefore expand the business structure, open for many businesses from the Thai-way, and another world's, ie Constructive in industry, Development material's, electro-Technology and many another categories of the business.

The Imperium of Diamond's is today with special plants for the technologies and Industrial Intelligence, therefore if we open in first time only the technology, the Electronic's, the Constructing, Industries, therefore the government can use economical cycles of production, and economical registering, therefore support our cooperation according investment from the Central Bank.

The Imperium of Diamond's have technology plans for development special form's of robotic cars who can move more than 1.000.000 move point's between only "one second", the IJS have plan to support every Start Corporation, the first corporation who support the development cooperation on the Diamond Oasis. Therefore, if you are like produced the cars, than you can between them produced more than 100.000.000 cars, because the Imperium of Diamond's will support you and nearly your business in the Diamond Oasis.

Development of the City Infrastructure for 10.000.000 people is value of time, only to 5-10 month's, if we use another method of today industry, than development of the city can be developed between 5 week's, too with special option use special technologies who develop one skyscraper between few minute's, according massive development.

Therefore, our main play for first primary Industrial structure development is progress into the sources development of the water center's and the mining zone's, industrial build of the Center base in the International water's, and therefore we can raw the water, the Oils, the Gas, the Metal's, the Organism's, the fish's and too trade structures as the port's. Open one Port is financial value in some millions £. The Imperium of Diamond's can immediately pay your profit for the port's production, constructing.

One of the Industrial hall is developed for production of the Orbital-crafts who can fly into Orbital zone of the Earth and therefore fly free without "the Board Customs" into anywhere another country or position in the world. One Orbital-craft can connect the Diamond Oasis, from position of the Thai-way, between few easy minute's travel without the gravity.

In interest of the water center's for mining of the sources, we therefore can use every center as the local zone and point, the same form as the one city. Every material's and the Development option.

Therefore, If Dear Thai-way people support the Construction of the Water-Tank 20x10x100 meters, the water tank from Gary boxes, than therefore we can commonly and under common profit construct the Industry zone for development of the Build material's, the metallurgy, the Electronics, the Construction, therefore we have in next week full development power of the All forms of the Falls, the Oil's, the Gasses, the Sea production, and too, we can immediately mining on another planets in the Universe. This mean, that development of the Diamond Oasis is without the Limiting, and therefore every Thai-way Business man and trader can open his commercial Branches and cooperated. Very great step for every their people.

The first infrastructure of the business and economy sites, is therefore only agro-culture, water-source's and handling, Laboratory development materials, production of the transport vehicles, the metallurgy and robotic machines, the two generations, the electronics and internet with telecommunication (+ intranet), the Chemistry, the Farmacia and emergence, the finances and bank offices.

Time, when is open first structure of this Trade and business corporations, than the Thai-people need't use their money for Start Investment, because here is full option to the development, and therefore if the Thai-people like open new branches in the Diamond Oasis, than Dear Thai-people can easily contact the Asia center and the TAITRA, therefore optionally use the management agreement of the Commerce branche development, and than therefore agree about the Buy of the basic source, buy the people or robotic for cooperation and production, and after automatically sell, change in the Oasis trade, and therefore is profit use for the Start of your Branches, basic source and employ.

If You is interested for development of Your Branches of the Corporation, in the Diamond Oasis, than immediately the government of the Imperium of Diamond's like agree with Your strategy and therefore the ID's government support You, according the investment from the Central Bank, and than You can immediately buy the robotic arms, and Your Commercial branche is full function without any employment. Your branches and corporation is under ID's automation project and therefore You need only the manager, the council of planing and the office, the office who is too developed from the Imperium of Diamond's federal government into the Skyscrapers.

First structure of the Trade, Diamond Oasis coins and Banknotes, the digital points of the Central Bank, and other registered bank's, into 10 month's economy in minimal value who outstrip the Dollar be calculation on 60\$ for only 1 DMD, as a only start of the ID's Oasis civilization.

One structure of the Internal Active Finances, Second structure of the Foreign Active finances use for International trade and cooperation. Ideal form for currency stabilization and safely develop without the strong inflation according prevention management. the ID's government have plan for many future Ten year's, how to rapidly grow the economy and values. Last step into next ten year's is currency and GDP value 10.000.000.000.000.000.000.000.000 € with re-calculation into only 10.000.000 people, every ten million people.

At the Moment, when is the Diamond Oasis civilization active and stable, between single year without the risk, than the king Peter Gottwald like search the Corporation's for cooperation, option about the Consortium agree and commonly development of the Planetary Civilization who is based only on the Android's population and High-Speed-Tech's with full possibilities for development of the Universal Andro-Civilizational Ships, as the Common Consortium cooperation.

The King Peter Gottwald have today many industrial plant's and format of Technologies who can really between single 7 days produced the Universal Ship with capacity as the Paris Industrial system of the Special management zone according the Government planing. The King today develop the Intelligence who can produce every day more than 1.000.000.000.000 Universal Civilization Ships. We can develop New Worlds.

The Royal Consortium is placed for cooperation between the Corporation's who have the Legal register in the Diamond Oasis territorium, and the categories of the Electronics, the Metallurgy, Computer's, Biology and Genetical Engineering, the Nanotechnologies, the Chemistry, the Mining, the Research and the Science, many another categories of the Corporation's who is ideal and important into "Universal Development".

In the Interest of the ID's Diamond Oasis, and development cooperation, we can too cooperated with many another corporations from the whole world. the African and Middle-East corporations, the Asian Corporations, the Latin America and America corporations, I too very like agree with the Australian corporation's about the cooperation, and after too I can agree with the European corporation's.

We can start the cooperation in form of the Globalisation and Development on Common Global success, the friendship and many new partnerships.

Therefore is too, for You, Dear Thai-Wanese people and businesses, very good option to cooperated in ID's interest, and therefore agree and management plan between too the African and Middle-East or Asian corporations.

Very good is step in direction to agree for all Your Local "Offshore Company Services", and they are can therefore open new business branches in the ID's Diamond Oasis, and therefore Your start is immediately very easy and productive, supported from every of the Offshore Company Services.

The Imperium of Diamond's have development plans into the Universe, and therefore development cooperation too "between every Offshore Company Service agentur's" who therefore can open new branches on another planets and cooperatively develop of new civilization.

Your Invitation, for Asian Offshore Company Services agentur's can very productively support Your trade and business.

If Your Corporation too support the Colonies development, than your Corporation have too right for open the Imperium of Diamond's Colony be the Consortium of Your cooperative businesses subject's, and therefore if Your team is able to ID's our common agree in goal, than Your Colony have too right for Declaration of the State of the Colony with developed civilization on another Planets in the Universe, and therefore You are the New Federal State of the Imperium of Diamond's.

The Imperium of Diamond's can cooperated with Your Colony, and therefore Your colony can develop the Universal Ship who can fly into the Universe, on another planet's.

The Imperium of Diamond's Federal Government have very great interest for the Thai-Wan Government and common cooperation, too for supporting of the One World project and therefore according diplomacy we can agree and declare the Thai-Wanese Federalisation into the Imperium of Diamond's and therefore create the Common Government.

The Federalisation into the ID's Fed. Government is for Thai-Wan very great option, the step for Legal territorial soil use and civilizational development according the Thai-Wan Jurisdiction, option for full Legal cooperation between the polity in the World and therefore option for Legal membership in the UN organisation, the WTO, another International Organization and with the Global Bilateral recognition from every government.

The Thai-Wan government therefore can develop new Thai-Wan civilization in the Universe and therefore open special form of civilization, according the ID's special technologies, therefore the Stellar City who is build on 100 civilizational Planets around the One single Star, anywhere in the Universe.

I too very like our cooperation and therefore, we can commonly declared or agree about the Culture cooperation, open the option how to develop the Culture center's in our countries, today. Culture presentation and development, social cooperation.

The King Peter Gotthard, the King of the Imperium of Diamond's, I really very thank for Your Interest for my test, and the letter, I am very glad if You are like agree about our cooperation for business and development, the Businesses, the Companies and the Bank's cooperation and the common progress, therefore the Thai-Wanese people can start the Great time in dimension of the Universe.

I very Thank You!
I wish You the Good Success!!

the King - Gotthard
