

Partial List of Gods

It would be impossible (1 in 5000+ odds) to pick the one, true, real god - if any.

There are many gods not on this list (only about 5000 are on this list.)

They run from A . Z. In fact, %A+ is literally the full name of a particular god! (She's a Babylonian moon goddess.)

A whopping 667 gods begin with the letter %A+, alone!
